Core Staking Models

Bankroll Defense

1. Low-Volatility Scalp (1.20x) — **80.83% Win Rate**

Automate single bet at 1.20x. Maximum 1-2% bankroll per round. High frequency compounding designed to absorb short downswings without bet doubling.

2. 2:1 Asymmetric Dual-Bet Hedge — **Risk-Neutral**

Bet A (70%): Auto-cashout at 1.50x to completely cover total wager.
Bet B (30%): Target 3.00x - 5.00x for pure profit with zero downside once Bet A hits.

3. Anti-Martingale (Paroli) — **Streak Defense**

Double bet only upon a win up to 3 consecutive wins; reset to base stake immediately on loss. Avoids catastrophic Martingale table-limit liquidation.

Mathematical Reality: $P = \frac{0.97}{M}$ | $EV = -3.00\%$.
⚠ *Scam Warning:* Multipliers are hashed via SHA-512 with real-time seeds. "Predictor APKs" and signal bots are fraudulent.
